

General Information

Chemical Formula	NaClO	
Synonym	Sodium Hypochlorite	
Origin	China	
H.S. Code	2815300	
CAS No.	7681-52-9	
Molecular Weight	74.44 g mol ⁻¹	

Application

Textiles	It is used to bleach textile and removal of stains from laundry
Water Treatment	It is used to disinfection of drinking water or water systems
Chemical Reagent	Is is used for industrial chemical synthesis
Other applications	It is used for chemical reagent, surfactant, and oxidising agent

Specification

Property	Units	Value
Appearance		Greenish-yellow solid
Purity	%	10-15
Density	g/cm ³	1.11
Solubility in Water (20 °C)	g/100 ml	29.3
Melting Point	°C	18
Boiling Point	°C	101
Color		White

Packaging

•864 @ 25 kg plastic drum, 21.6 MT / 20'FCL
